

CURIOUS CONDENSATIONS.

There are close upon 10,000 "professors of music" in London. There are over 80,000 people connected with the stage in London.

Rome is said to be growing faster than any other European city.

The first geographical map of England was made in the year 1520.

To make one pound of honey the bees must visit from 90,000 to 200,000 flowers.

The London Religious Tract Society last year issued 77,000,000 publications.

The foreign trade of the United States in manufactured furs reaches \$5,000,000 a year.

A Salt Lake City editor, who is blind, is to have his eyes replaced by those of a rabbit.

Geneva, O., thinks it has the only horse in the world that can turn a complete somersault.

The Sultan of Turkey has attached to his body guard a soldier who is 110 years old.

Arizona has a gross area of 113,020 square miles, of which only 120 square miles are water.

A Gordon, Ga., school teacher promoted a boy to the head of the class for spelling cat "quatte."

Of the 17,000,000 wage earners this country, 7,000,000, or 44 per cent, are engaged in farming.

Fifteen closely printed pages of the London city directory are filled by the Smith family in that city.

A woman of Augusta, Me., is 96 years old, yet is considered one of the best piano players in that city.

During a fire in Buffalo, N. Y., a case of lamp chimneys fell from the third story, and not a chimney was broken.

The sister-in-law of a pauper in the poor house at Glasgow, Scotland, has bequeathed £70,000 for church purposes.

There are said to be over 23,000 Indians in the United States who can read English, and over 10,000 who can read Indian languages.

A Yale, Mich., business man whose sign reads "Undertaker and Photographer," is said to give a photograph with every coffin he sells.

In the United States 83,886,829 of tea and 499,159,120 pounds of coffee were used in the last year of record. The value of these imports is \$91,548,925.

The French chouvins rebel against the use of the English word "yacht," and in deference to their feelings the word will probably be spelled "yante."

A mechanic of Covington, Ky., has succeeded in welding aluminum with glass, and the manufacture of flexible glass, he thinks, is involved in his discovery.

Smart little boy at the breakfast table—"Mamma, I want three lumps of sugar instead of two."

"Why, my child?" "Because sugar is on the free list."

A Mussulman is now traveling through India collecting money for a Mohammedan mission in England. Part of the money is to be spent building a mosque at Liverpool.

An official letter from the Eastern Lunatic Asylum, of Virginia, to the governor of that state, states that one of the inmates has been there for 54 years, and is 109 years old.

Chesaning, Mich., has a man that goes into trances and converses with the angels. While in this state he can be lanced to the bone without bleeding, the wound healing in a few hours.

The new States have already received their nicknames. Washington is the "Chinook" State, North Dakota the "Flicker-tail" State, South Dakota the "Singed Cat" State and Montana the "Stabbed-toe" State.

An immense mine of graphite (lead pencil lead) has been discovered near the city of Wladikawkas in Asia. It is said to be excellent, and as good roads lead from the mine to that city it will be utilized immediately.

The custom of keeping birthdays is many years old. It is recorded in the fortieth chapter of Genesis, twentieth verse: "And it came to pass the third day, which was Pharaoh's birthday, that he made a feast unto all his servants."

A number of Japanese, direct from Tokio, have purchased land in San Diego county, Cal., and will engage in silk culture. The business annually amounts to \$400,000,000 throughout the world, but Americans do not take much interest in it.

An English scientist writing of lightning, quotes figures showing that in England and Wales, from 1852 to 1889, the average annual death rate from lightning was considerably below one per 1,000,000 of the population.

When Mars is nearest to the sun, and the earth farthest from the sun, the two planets are at the least possible distance from each other. The most favorable condition occurs once in about fifteen

years. Such will be the case in 1892, and such was the case in 1877, when the Martian moons were discovered.

It is perhaps not generally known that every important factory in Russia is opened with divine services. A great brandy distillery was opened near Kazan, on the Volga, with services conducted by the clergy of that locality.

The Cincinnati Chief of Police recently received a queer letter from Breen, O. The writer says he has a preparation that will prevent prisoners from resisting arrest. "It kills them for an hour," he says, "but after that time they recover."

The statistics of the trade unions in Germany show that about 2,000,000 workmen in that country have an annual income of less than \$155, and that in the weaving districts of Saxony and Silesia there are thousands of men earning but \$75 per year by their trade.

There is now being finished at Greenville, Pa., a disc of glass for a refracting telescope lens, which is claimed as the largest that has ever been made in the United States. The disc is 30 1/2 inches in diameter by 5 1/2 inches in thickness, and weighs over 300 pounds.

A New York club recently gave a dinner to all the principal freaks in the dime museums. Living skeletons, fat women, turtle boys, contortionists, magnetic women, Chinese giants, calf-headed boys, three-armed and four-legged born, and danced with their hosts.

Few people can form a definite idea of what is involved in the expression, "An inch of rain." An inch deep of water on the surface of an acre of land will weigh 220,000 pounds, or 100 tons. One-hundredth of an inch (.01) alone is equal to one ton of water to the acre.

The great festival of the English milkmaids and chimney-sweeps of the 1st of May dates its origin back to the Romans, who were wont to commemorate the festival of Flora, the goddess of flowers, for several days in May. May-poles were forbidden to be erected by Parliament in 1644, but they were restored again on the restoration of Charles II., and in 1661 the May pole in the Strand was reared with much ceremony and rejoicing. This pole which stood near where Catharine street joins the Strand, was of cedar, and was raised by twelve seamen, commanded by the Duke of York, who was then Lord High Admiral of England.

The Language of Stamps.

The language of postage stamps is as follows: When a stamp is inverted on the right-hand upper corner it means the person written to is to write no more. If the stamp be placed on the left-hand upper corner inverted, then the writer declares his affection for the receiver of the letter. When the stamp is in the centre at the top it signifies an affirmative answer to a question or the questions, as the case may be; and when it is at the bottom it is a negative. Should the stamp be on the right-hand corner, at a right angle, it asks the question if the receiver of the letter loves the sender; while in the left-hand corner means that the writer hates the other. There is a shade of difference between desiring one's acquaintance and friendship. For example: the stamp at the upper corner at the right expresses the former, and on the lower left-hand corner means the latter. The stamp on a line with the surname is an offer of love; in the same place, only reversed, signifies that the writer is engaged. To say farewell the stamp is placed straight up and down in the left-hand corner.—[Phil. Record.]

Teach Loyalty.

In his recent address on education in which such a decided stand was taken against classical learning, the Emperor William said many things in which the general sentiment of the American people will hardly agree; but when he said "our schools must educate the growing children, above all other things, into a spirit of unswerving loyalty to their government, permitting neither descent nor religion to interfere with it," he gave utterance to a doctrine which will be heartily commanded here. In fact, the sentence sounds like an extract from an American rather than a German speaker. We have just this problem of alien descent to deal with in many States, and the Emperor's words would make a good plank in a state platform.

Simple Remedies.

Wet tobacco will relieve bee or wasp stings. For nausea lay a little pounded ice on the back of the neck. For neuralgia bruise horse radish and apply as a poultice to the wrist. A couple of figs eaten before breakfast are an excellent laxative, especially for children. When suffering from overstrained and tired eyes, bathe them in hot water several times a day.—Housekeeper's Weekly.

DR. J. COLLIS BROWNE'S CHLORODYNE.

THE ORIGINAL and ONLY GENUINE Advice to Invalids.—If you wish to obtain quiet refreshing sleep, free from headache, relief from pain and anguish, to calm and assuage the weary aching of protracted disease, to invigorate the nervous media, and to regulate the circulating systems of the body, you will be cured by Dr. J. Collis Browne's Chlorodyne (Late Army Medical Staff), to which he gave the name of CHLORODYNE, and which is admitted by the profession to be the most wonderful and valuable remedy ever discovered.

CHLORODYNE is the best remedy known for Coughs, Consumption, Bronchitis, Asthma, Cholera, and is the only specific in Cholera and Dysentery.

CHLORODYNE effectually cures short attacks of Epilepsy, Hysteria, Palpitation, and Spasms.

CHLORODYNE is the only palliative in Neuralgia, Rheumatism, Gout, Cancer, Toothache, Menstrual, &c.

From Symes & Co., Pharmaceutical Chemists, Medical Hall, Simla, January 3, 1880. To Bloomsbury, London. Dear Sir,—We embrace this opportunity of congratulating you upon the wide-spread reputation this justly esteemed medicine, Dr. J. Collis Browne's Chlorodyne, has earned for itself, not only in Hindostan, but all over the East. As a remedy for general utility, we must question whether any other is imported into the country, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are sorry to say, are now relegated to the native bazaar, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances ad infinitum of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhoea, Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Cholera, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Cholera, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years.

We have never used any other form of this medicine than Collis Browne's Chlorodyne, and the public are of opinion that the substitution of any other of the name is a deliberate breach of faith on the part of the chemist.

OF THE CHEMIST TO PRESCRIPTION AND PATENT ALIKE. We are, Sir, Collis Browne's Chlorodyne, and the public are of opinion that the substitution of any other of the name is a deliberate breach of faith on the part of the chemist.

CAUTION.—Vice-Chancellor Sir W. Wood stated that Dr. J. Collis Browne was undoubtedly the inventor of Chlorodyne; that the story of the defendant Freeman was a thoroughly untrue, which he regretted to say, had been sworn to.—See "The Times," July 19, 1884.

Sold in bottles at 1s. 15d., 2s. 9d., 4s. 6d., and 11s. each. None is genuine without the words "Dr. J. Collis Browne's Chlorodyne" on the wrapper. Beware of cheap imitations.
